

MEDIA RELEASE

Market Update: May 2009

The market over the past month has seen some very strong results.

Although stock levels are still down by 50 plus per cent in the 'top end', buyer interest remains strong.

Whilst an under supply of stock may seem like a bad thing, it has under pinned prices and will ensure the market will not fall as dramatically as some overseas markets have.

The 'Gold Collar Workers' or better known as 'Expatriate Australians' have been returning to our shores and buying significantly.

Abercromby's are conducting several top end sales this month, including the below:
